PROFESSIONAL SUMMARY

Full-Stack Developer with **3+ years** of experience in building and shipping production applications across web and mobile platforms. Proficient in **JavaScript, Node.js, and AWS**, with a strong focus on integrating **AI-powered features** using **Claude Code**. Delivered multiple projects that digitized workflows, enhancing operational efficiency and user engagement.

WORK EXPERIENCES

Software Developer | Freelance

Jan 2024 - Present

Self-Employed

Remote, India

- Delivered **8+ freelance projects** spanning frontend development, full-stack applications, workflow automation, and **AI-powered features** using **Claude Code** and **Cursor**.
- Led end-to-end development of **2 MVP products** for international clients, translating business requirements into production-ready applications with integrated **REST APIs**.
- Engineered an AI voice agent for automated call handling and appointment scheduling, reducing manual customer interaction tasks.
- Built and deployed **2 full-stack business platforms** for government services and inventory management, digitizing previously manual workflows using **REST APIs**.

Technologies / Skills Used : React, Node.js, Express, MongoDB, Tailwind CSS, Vue, HTML/CSS, Javascript, Claude Code, Cursor, REST APIs, Android Development

Frontend Developer

Jul 2022 - Jan 2024

dE Elite Concepts

Gurugram, India

- Led frontend development for Affverify, delivering scalable web solutions supporting affiliate marketing operations.
- Built a Chrome Extension that automated repetitive workflows, reducing manual effort and improving team productivity.
- Developed **30+ responsive web pages** for AWS projects from Adobe XD designs, ensuring cross-device compatibility.
- Automated AWS content publishing through Uberflip, streamlining the management of videos, eBooks, and marketing assets.

Technologies / Skills Used : HTML/CSS, Javascript, Uberflip, Adobe XD

PROJECTS

Kagaj Wala | CSC Service Platform | View Project

2026 - Present

- Built a full-stack platform connecting citizens with CSC agents for government services, enabling document uploads, task assignment, and status tracking.
- Developed real-time chat, file sharing, payout management, and email notification systems to streamline service delivery workflows.
- Deployed and maintained the platform on Railway, ensuring reliable operation and cost-efficient scaling during active development.

Technologies / Tools Used : React, Node.js, Express, MongoDB, Tailwind CSS, Socket.io, Cloudinary

Cloth Supplier Inventory Manager | View Project

2025

- Built a private inventory management web app for a UAE-based cloth supplier, tracking design distribution across hundreds of showrooms.
- Replaced a manual paper-based IN/OUT process with a streamlined digital workflow, improving inventory visibility and record accuracy.
- Deployed and maintained the application on Railway, aligning with the client's preference for cost-effective hosting.

Technologies / Tools Used : React, Node.js, Express, MongoDB, Tailwind CSS, Cloudinary

SKILLS

Databases :	MongoDB
Frameworks & Libraries :	React, Node.js, Express.js, Vue
Tools & Platforms :	Bootstrap, Tailwind CSS, Git, GitHub, NPM, n8n, Postman
Programming Languages :	JavaScript, TypeScript
Languages :	English, Hindi, Urdu

EDUCATIONS

Integral University | Lucknow, India

Aug 2018 - Jun 2022

Bachelor of Technology (Cloud Technology & Information Security- Computer Science)
